DETAILED ACTION

2. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 2615.

Information Disclosure Statement

3. The information disclosure statement filed February 10th, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Non-patent literature item "A21" was not provided and therefore not considered.

Specification

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
7. Claims 1, 17, 24-28, 31, and 34-40 recite, "determining a direction of a power". It is unclear how a power can have a direction. This is assumed to mean determining the direction of the sound events from the users current position.
8. Claims 1, 17, 24-28, 31, and 34-40 recite the phrase "channel pair". It is unclear what this is intended to mean. It could be intended to mean a single speaker connection (signal and ground) or a stereo arrangement (Left/Right)).

Claim Rejections - 35 USC § 101

9. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

10. Claims 26, 27, and 38-40 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. An electromagnetic signal does not constitute statutory subject matter.
